I think the EPA round robin timeslot would be 2-3:30ish.

Yes, I can say some things that day. 12-1 is booked but rest of day looks flexible.
Cheers. -BC

Hi Ben, we are now targeting 5/25 - any chance you can give a nutrient modeling update (TMDLs Salish Sea etc) -15 mins or so?

Thanks again, Rochelle

Hi All,

I am prepping for the 2017 nutrients/HABs roundtable meeting. Our plan is to do a one-day webinar in May (23rd or 26th) that focuses on nutrients (with some HABs), with a separate day in June as an in-person at the Manchester lab - which will comprise a few speakers, and a hands-on algae ID and response-planning session. As with previous roundtable meetings, it will be open to all but presentations will be targeted mainly to state and tribal water quality programs. I am hoping that you will consider presenting during the one-day all-day webinar.

If this might work for you, can you let me know if you have a strong date preference? I am leaning toward 5/26 b/c of state/tribal agency staff schedules although I know that Fridays can be challenging to schedule.

I am hoping that you all would be available to do 15-20 minute presentation on these topics:

Brian - overview of permits with nutrient limits development
Gretchen- latest national sampling results related to nutrients for the PNW
Ben - latest on nutrient modeling for Puget Sound and in other contexts nationally.
Thoughts on latest and greatest re nutrient modeling
Cheryl - overview of the marine thresholds from Yaquina and more recent papers related to estuarine nutrient thresholds.

Thanks for considering it,
Rochelle
